

Name: Frederik Veldink

Subject: Red River phosphorous pollution

Message:

I would very much appreciate to be kept informed in regards to measures that are in place to reduce nutrients flowing into the Red River from both American and Canadian jurisdictions.

Also, in case there are no measures in place, I strongly urge the Commission to do everything possible to restore the health of the Red River watershed and ultimately Lake Winnipeg.

The health of the Great Lakes has improved over the years. The same must be done for Lake Winnipeg. Thank you.

Frederik Veldink
